

Application of 小島 *Bird Free* to KT Wiz baseball stadium, Suwon, Korea, February/March 2015.

In 2015, *KT Wiz* (sponsored by Korea Telecom) became the 10th franchise of Korea's professional baseball league (KBO League). In order to eliminate a severe pigeon infestation at the *KT Wiz Park* stadium (capacity 22,067) prior to the team's inaugural season, 小島 *Bird Free* was installed below the roof of the main stand, and in all other infested parts of the stadium, between 24 February and 2 March 2015.

Pigeons had been roosting below the roof of the stand and fouling the seats below. Treatment with 小島 *Bird Free* is shown above.

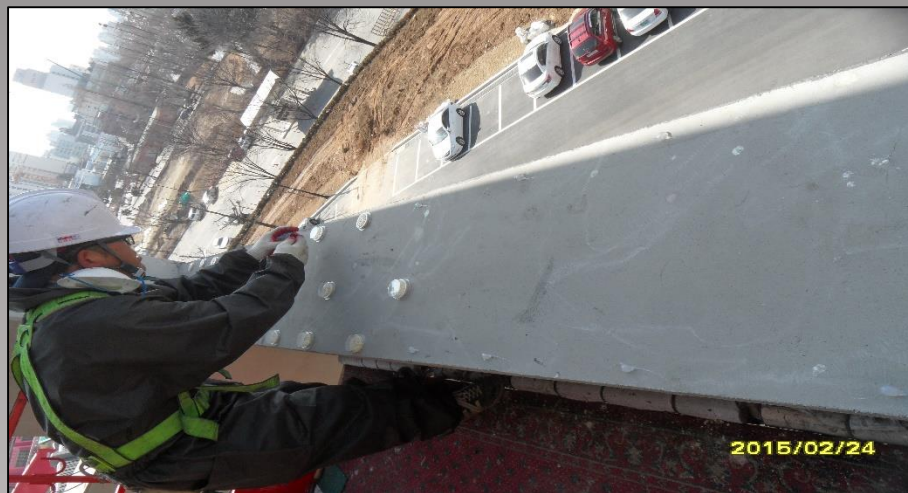

Pigeon nesting sites inside the stadium were treated with dishes of 小島 *Bird Free* as shown above.

Night roosting sites were treated with 小島 *Bird Free* as shown above.

Treatment of day roosts with 小島 *Bird Free*.

Installation of 小島 Bird Free – work in progress at KT Wiz Park.

An inspection of the stadium was carried out on 17 May 2018 (see photos above), three years after 小島 *Bird Free* was installed. No pigeons were observed.
